## PROJECTS

- **Movie Recommendation System:** Developed a web application using machine learning techniques, specifically the Bag of Words model. The project's frontend has been built using HTML, CSS for an intuitive user experience and leverages Jupyter Notebook for robust backend model training. This project confidently delivers relevant movie suggestions to users.
- **Weather App:** Developed a weather using React that fetch and displays current weather data using the Weather API. Users can search for cities and view real-time weather conditions and details.
- **Cryptocurrency Web:** Developed a Cryptocurrency Web using HTML, CSS and JavaScript that fetches real-time coin data from Coin Gecko API, featuring detailed coin statistics, market data, and interactive charts for price analysis over customizable date ranges.

## CERTIFICATIONS

- Cloud Computing Fundamentals by Alibaba Cloud (Nov '21)
- Introduction to Cyber Security by Cisco Network Academy (May '23)

## PARTICIPATION AND ACHIEVEMENTS

- **Event Organizer at Kavyanjali:**  
Organised various events on the University campus like Blood Donation camp, cleanliness drive etc.
- **Organizing Team Head:**  
Organised various gaming events for over 500+ students.

## HOBBIES

- Playing Badminton, Listening Music and Cooking
